Subject Index to Volume 10

Acid: in gastric mucosal defense 731
Acidosis: in hypoxic and ischemic injury 1318
Acne: treatment with retinoyl β-glucuronide 1014
Actin fold: as a nucleotide binding motif 799
Activation constants: in allosteric enzymes 702
Activation function AF-2: transcriptional mediators of 940
Activator protein-1 (AP-1)
  redox regulation of 709
  transrepression by retinoid receptors 1002
Acute promyelocytic leukemia
  altered retinoic acid receptors in 955
  retinoid differentiation therapy in 1025
S-Adenosylhomocysteine hydrolase: as a pharmacological target 471
S-Adenosylmethionine: and methylation 471
Ad4BP/SF-1: transcription factor for cytochrome P450 genes 1569
Adipocytes: pyruvate carboxylation in 481
ADP ribosylation factor: GTP binding motif of 1347
AF-2 domain: of human retinoic acid receptor α 1524
Aggrecan: inhibitory effects on neural crest cell migration 293
Aging
  and lymphatic absorption of retinol in rats 1085
  melatonin decrease and neurodegeneration in 1546
  oxidative damage to DNA in 333
  oxidative damage in stress and 1532
***agouti*-induced obesity:** effects of calcium channel blockade on 1646
Agrin: genes encoding 598
Ah receptor nuclear translocator: transcriptional regulation of the *CYP*1A1 gene by 809
AIDS: transcription factor binding sites in genes involved in 709
Alcohol dehydrogenase: in ethanol-induced reduction in retinoic acid 1050
Aldehydes: iron-peroxy species in deformylation of 428
Aldehydr dehydrogenase class 3: hormonal regulation of 1369
Aldose reductase: increased by hypertonicity 1598
Algal blooms: effect of nitrate on 1443
All-*trans* 3,4-didehydroretinoic acid: equals all-*trans* retinoic acid in support of neuronal development 1078
All-*trans* retinoic acid: in chick neuronal development 1078
Allosteric enzymes: models for chemomechanical energy transducing assemblies 702
α/β barrel proteins: structure and evolution of (Letter) 184
Alprazolam: effect on response to acute stress 517
Alzheimer's disease
  human apolipoprotein E in 1485
  metallothionein down-regulation in 1129
Amino acids
  in cell volume increase during the cell cycle 920
  critical for transcriptional activity 1524
  substitutions fixed by P450 enzymes 683
Amino acid sequences: assigning to protein folds 126
Amino acid starvation: protein synthesis inhibition in response to 1378
γ-Aminobutyric acid: currents activated by 1539
Aminolevulinate synthase: levels decreased by melatonin 882
Androgen: in restoration of cytochrome P450 2C11 1058
Angiogenesis
  estrogen and 615
  inhibition by thrombospondin 1183
Anterior pituitary cells: glutamate receptors in subpopulation of 654
Antibody-dependent cellular cytotoxicity: in HIV infections 258
Antigen-presenting cells: engineering of 574
Antigens: intrathymic injection of 721
Antioxidant enzymes: mRNA levels increased by melatonin 882
Antioxidants: and regulation of gene transcription 709
Antiviral responses: vitamin A and retinoids in 979
Apolipoprotein E: the Alzheimer's disease connection 1485
AP-1 transcription factor: activity increased by stretch 631
Apoptosis
  of bFGF-deprived endothelial cells 1192
  effects of CD38 on 1408
  induced by choline deficiency 510
  induced by *N*-(4-hydroxyphenyl) retinamide 1014
  induced by RAR and RXR selective ligands 1071
  liver hyperplasia and 1118
  role of proteases during 587
  tumor cell resistance to 325
Apoptotic protease AP24: and tumor cell resistance to apoptosis 325
Arachidonic acid cascade
  cytochrome P450 in 1456
  molecular biology of enzymes in 1147
L-Arginine: hydroxylation by a cysteine thiolate-liganded heme protein 552
Arylhydrocarbon receptor: transcriptional regulation of the CYP1A1 gene by 809
Astrocytes: metallothioneins in 1129
Ataxia telangiectasia: increased incidence of cancer in 238
Atherosclerosis
  fibronectin variants in 248
  inflammation as a component of 283
  transcription factor binding sites in genes involved in 709
Atherosclerotic heart disease: looking for the "smoking guns" 654
Atherosclerotic plaques: role of calcium in development of 491
ATP
  calcium leak regulated by 302
  functional interaction with hexokinase 799
  utilization by chemomechanical transducers 702
A23187: K^+ channel activity increased by 792
Autoantigen: myelin protein Po as 1635
Autoimmune inner ear disease: myelin protein Po in 1635

Bacteriophage coat protein: role of chaperonins in folding of 5
BCECF: calibrations in vascular smooth muscle cells 1205
Benzodiazepines: modulation of response to acute stress by 517
β-blockade: modulation of response to acute stress by 517
Betaine transporter: activation by hypertonicity 1598
Bicarbonate: in gastric mucosal defense 731
Bicuculline: blockage of halothane- and GABA-activated currents 1539
Bisindolylmaleimide IV: increase in L-channel current blocked by 1310
Blood
  clotting, fibronectin variants in 248
  safety in the age of AIDS 390
Blood clots: formation and dismantling 1464
Blood flow: mucosal, in gastric mucosal defense 731
Bone marrow transplantation
  effects of glutamine supplementation in 821
  immunobiology of 721
Bovine pancreatic trypsin inhibitor: disulfide folding pathway of 110
Brain
  fyn kinase altered in a murine AIDS 339
  metallothioneins in 1129
  oxidative damage caused by immobilization stress in 1532
Brain damage: after stroke or seizures in melatonin-deficient rats 1546
Brain trauma: melatonin potential for treatment of 891
Breast cancer cells: defective expression of retinol binding protein in 1064
Bullous pemphigoid antigen: hemidesmosome, structure and function of 871

Cachexia: role of glutathione in 1219
Calcium
  cytochalasin effect on 357
  effects on migration and recruitment of macrophages 491
  leak from agonist-sensitive stores regulated by ATP 302
  mobilization induced by thrombin and trypsin 309
  regulation of neuronal nitric oxide synthase 552
  signaling, spatial and temporal aspects 1505
Calcium-activated K^+ channels: opening of in eosinophils 792
Calcium-binding proteins: effects on desmin assembly 317
Calcium channel blockade: effects on *agouti*-induced obesity 1646
Calcium channel currents
  enhanced by IL-1β, TNF-α, and LPS 785
  modulation by PACAP 1310
Calcium release channel: mRNA, effect of etomoxir on 1303
Calmodulin: regulation of neuronal nitric oxide synthase 552
Calpains: role during apoptosis 587
Calphostin C: increase in L-channel current blocked by 1310
Calyculin A: sensitization of cells to TNF and UV activation 325
cAMP-dependent protein kinase: in PACAP modulation of calcium channel currents 1310
Cancer
  effects of carotenoids in 690
  looking for the "smoking guns" 654
  polygenic model of inherited predisposition to 865
  transcription factor binding sites in genes involved in 709
Cancer chemoprevention: retinoids in 1031
Cancers: with structurally altered receptors 955
Carbohydrates: binding by hyalectans 598
Carbonic anhydrase isozymes: role in pyruvate carboxylation in adipocytes 481
Carbonic anhydrase V: differnetiation-dependent expression of 481
Carcinogenesis: defects in cell cycle checkpoint control and 238

Cardiac arrhythmias: treatment with 5-HT_4 receptor agonists and antagonists 1398
Cardiac hypertrophy
mechanical stress induced 631
modification of gene expression by etomoxir in 1303
Cardiac myocytes: stress-activated protein kinases in 631
Cardiac surgery: effects of glutamine supplementation in 821
Cardiomyopathy: hypertrophic, decrease of HSP90 in 1198
Cardiovascular diseases: effects of carotenoids on 690
Cardiovascular system
endothelial control of 283
protection by estrogen 615
β-Carotene
and disease prevention in humans 690
metabolism of 542
Carotenoids
absorption, metabolism, and transport of 542
and disease prevention in humans 690
functions in higher plants 403
genetics of pigment biosynthesis 228
Catalase: iron regulatory protein inhibition prevented by 1326
Catalytic cycle: conformational changes in 702
Cataracts: effects of carotenoids on 690
CCAAT/enhancer ginding protein (C/EBP) family 267
$CD4^+$ T cells: expression of LAG-3-encoded protein by 769
CD36: thrombospondin-1 binding to 1183
CD38: multiple functions of 1408
Cell cycle
cell volume increase during 920
checkpoints and DNA damage 238
during liver regeneration 559
Cell growth regulation: sphingolipid metabolism and 1388
Cell-surface engineering: with GPI-anchored proteins 574
Cell-surface receptors: redistribution initiated by ac electric fields 1552
Cellular immunity: responses reduced by partial sleep deprivation 643
Cellular retinol binding protein: modulator of enzymes of retinol metabolism 993
Central nervous system regrowth failure: transplantation of activated macrophages in 1296
Ceramide
DNA cleavage induced by 325
phospholipases in generation of 1147
sphingolipid hydrolysis to 1388
Chaperones
molten globule as a model target of 102
and protein stability 84
Chaperonin-containing TCP-1: peptide mass fingerprinting of 137
Chaperonins
competing models of function of 20
functional principles of 10
in protein folding, investigation by mass spectrometry 93
role in protein folding 5
Chaperonin substrates: thermolabile folding intermediates and 57
Chemotaxis: bacterial, methylation in 471
Chlorophyll: interaction with carotenoids in higher plants 403
Cholangiocarcinoma: development of hepatocytes into 673
Choline
deficiency, apoptosis induced by 510
dietary supplementation in pregnant rats 1653
Choriocarcinoma cells: erythropoietin expression by 760
Chromatin
interaction of the arylhydrocarbon receptor with 809
and transcription 1173
Chromium(III) picolinate (Letter) 365
Chymotrypsin: activities detected with synthetic substrates 1621
Circadian system: nitrate as a signal for 1443
c-myc proto-oncogene: posttranscriptional regulation of 819
Coagulopathy: treatment with all-*trans* retinoic acid 1025
Collagen
effects on cell viability, growth, and morphology 1471
secretion regulated by estrogen 615
Collagen/collagenase interaction: conformation of the enzyme and its substrate 927
Competitive exclusion principle: in RNA virus evolution 859
Conformational changes
in energy transducing assemblies 702
in nucleotide binding proteins 1257
in proteins employing the actin fold as a binding motif 799
Conformational search: protein folding and 119
Conformational stability: of proteins 75
Congenital abnormality: and abnormality of retinoic acid signaling pathway 961
Connective tissue activating peptide III: Leukocyte-derived growth factor-precursor of 1336
Contractile response: regulation by NO synthases 1614
Copper: metallothionein storage and release of 1129
Crambin: folding trials with 119
Cross-modulation: in the retinoid signaling pathway 940
Cross-talk: between JAK-STAT and other signaling pathways 1578
Cryptdins: of Paneth cells 1280
Crystals: dinitrobenzene, monoclonal antibodies that recognize 1435
CXC chemokine family: linked to PDGF chemokine family 1336
Cyclic ADP-ribose: synthesis catalyzed by CD38 1408
Cyclic AMP: fibronectin transcriptional regulation and 248
Cyclin-dependent kinases: and cell cycle checkpoints 238
CYP1A1 gene: transcriptional regulation of 809
CYP4A6 gene: regulation by peroxisome proliferators 1241
Cysteine: catabolism in liver 1219
Cytochalasin: effects on rectification in potassium channels 357
Cytochrome c: unfolding at alkaline pH 164
Cytochrome P450
in the arachidonic acid cascade and hypertension 1456
4A gene regulation 1241
hepatic, constitutive expression of genes 1112
peroxidative reactions of 428
structural flexibility and functional versatility 683
transcription and regulation of activities of 1455
Cytochrome P450 2C11: restoration in vitamin A-deficient rat liver 1058
Cytochrome P4501A1
hormonal regulation of 1369
induction of 809
Cytochromes P450
basal and inducible expression of 807
historical overview 202
structural similarities and functional differences 206
Cytokines
CD38 in induction of 1408
effect on ADCC effector function 258
in growth regulation during liver regeneration 413
impact on lipid mediator networks 1147
production suppressed by partial sleep deprivation 643
regulation of STAT-dependent pathways by 1578
responses altered in vitamin A-deficient hosts 979
and signal transduction during liver regeneration 215
Cytolytic T lymphocytes: effect of isothermal radiofrequency radiation on 913
Cytophilia: of immunoglobulins 1495
Cytoskeleton
control of rectification in potassium channels 357
effects of extracellular matrix on 1471
impact of apolipoprotein E on 1485
Ras GTPases in organization of 625
reorganization induced by ac electric fields 1552

Deadenylation: in mRNA decay 559
Defensins: of Paneth cells 1280
Denaturation: of staphylococcal nuclease mutants 67
Denatured state: role in protein stability 27
Dentatorubral-pallidoluysian atrophy: a trinucleotide repeat disorder 1589
Depression: effects of S-adenosylmethionine in 471
Desmin: assembly, effects of calcium-binding proteins on 317
Desmoplakin: structure and function of 871
Desmosomes: structure and function of molecular components 871
Dexamethasone: effects on postnatal lung 986
Diabetes: gestational, iNOS expression in 777
Diabetic complications: transcription factor binding sites in genes involved in 709
Diacylglycerides: phospholipases in generation of 1147
Diarrheal illness: effects of glutamine supplementation in 821
Diarrheal morbidity: vitamin A deficiency and 1040
Diet: role in disease prevention 690
Dietary restriction: influence on lymphatic absorption of retinol in rats 1085
Dinitrobenzene crystals: monoclonal antibodies that recognize 1435
Disease prevention: -carotene, carotenoids, and 690
Disulfide bonds: formation concomitant with folding 49
Disulfides: in protein folding 110
Diversozymes: peroxidative reactions of 428
DNA
damage caused by immobilization stress in rat brain 1532
damage and cell cycle checkpoints 238
mitochondrial, oxidative damage to 333
Drosophila: position effect variegation in 1173

Editorial
on the Clinton administration's approach to Science and Technology 533
Evolution of *The FASEB Journal* 937
FASEB and *The FASEB Journal* 375
Life Sciences Forum 1111
"...no empire, no sect, no star..." 1237
Setting the trends in Europe 197
Education of biochemical scientists (Letter) 530
Effector mechanisms: in graft rejection 721

Eicosanoids: phospholipases in generation of 1147
eIF-2 kinases: and control of protein synthesis 1378
Electric fields, ac: microfilament structure reorganization induced by 1552
Elongation factor EF-Tu: GTP binding motif of 1347
Embryonic development: and pattern formation 961
Encephalopathies: disruption of fyn kinase signaling in 339
Endonucleases: proteolysis in the activation of 587
Endothelial cells
bFGF-deprived, apoptosis of 1192
interleukin-1 receptors on 351
Endothelium
in control of the cardiovascular system 283
estrogen activity in 615
Endothelium-derived relaxing factor: estrogen and 615
Energy transducing assemblies: allosteric enzymes as models for 702
Energy transduction: nicotinamide nucleotide transhydrogenase and 444
Eosinophils: opening of calcium-activated K^+ channels in 792
Epidermal growth factor
action in liver regeneration studied in transgenic mice 819
during liver regeneration 215
Epilepsy-associated brain damage: melatonin potential for treatment of 891
Epithelial cells: induction by retinoyl -glucuronide 1014
Epithelium
cryptdins in 1280
pulmonary, development of 986
surface-active, in gastric mucosal defense 731
Epoxyeicosatrienoic acids: vasoactive properties 1456
***Erwinia* species:** carotenoid biosynthesis from 228
Erythropoietin: expression by human placenta 760
Escherichia coli
rates of protein systhesis by 5
suppressor analysis of *groES* mutations in 148
Esophageal carcinogenesis: inhibition by retinoids 1031
Estrogen
effects in ovariectomized rats 905
vascular protective effects of 615
Ethanol: inhibition of retinoic acid synthesis 1050
6-Ethoxyzolamide: inhibition of de novo lipogenesis 481
Etomoxir: modification of sarcoplasmic reticulum gene expression 1303
Evolution
of / barrel proteins (Letter) 184
of binding sites 461
conservation of N-linked glycosylation in 849
convergent, formation of neuronal nitric oxide synthase by 552
genomic, fibronectin gene as model for 248
of RNA viruses 859
Excitotonic seizures: brain damage after in melatonin-deficient rats 1546
Excitotoxicity: neuroprotection by melatonin from 891
Extracellular matrix
effect on cell structure, function, and responsiveness 1471
proteoglycans of 598
Eye lens crystallins: stability and folding of 84

Fat storage: regulation by agouti* 1646
Fatty acid synthase: regulation by *agouti* 1646
Fc receptors: attachment of cytophilic antibody to 1495
Fetal alcohol syndrome: potential mechanism for 1050
Fetal development: Ad4BP/SF-1 transcription factor and 1569
Fibrin: in blood clot formation 1464
Fibrinogen: anticipating a 3-dimensional structure 1464
Fibroblast feeder layers: transgenic mice for establishment of 1641
Fibroblast growth factor
acidic, in hepatic stem cell activation 1249
basic, and endothelial cell apoptosis 1192
release induced by mechanical load 502
Fibroblasts: growth stimulated by leukocyte-derived growth factor 1336
Fibronectin gene: model for splicing and transcription studies 248
Fingerprint region: of nicotinamide binding proteins 1257
Fitness variation: of RNA viruses 859
Foam cells: calcium effects on recruitment of 491
F1-ATPase: conformational changes in 702
Foreign compound metabolism: hormonal regulation of hepatic enzymes involved in 1369
Fragile X syndrome: a trinucleotide repeat disorder 1589
Fragmentin: role in apoptosis 587
Free radicals
damage to mitochondria in aging 333
metallothionein protection against injury by 1129
Friedreich ataxia: a trinucleotide repeat disorder 1589
Fruit ripening: participation of *S*-adenosylmethionine in 471
Fumonisins: inhibition of ceramide synthase by 1388
Fusion proteins: artificial, folding of 49
Fyn kinase: altered in brain in murine AIDS 339

$GABA_A$ receptor: halothane as partial agonist of 1539
Galactokinase: in the Leloir pathway 461
Galactose: interconversion with glucose in the Leloir pathway 461
Galactose mutarotase: in the Leloir pathway 461
Galactose-1-P uridylyltransferase: in the Leloir pathway 461
Gastric mucosal defense: cellular and molecular basis of 731
Gastrointestinal carcinogenesis: inhibition by retinoids 1031
Gastroparesis: treatment with 5-HT4* receptor agonists and antagonists 1398
Gene expression
flow-mediated regulation of 283
metallothioneins in 1129
osmotic regulation of 1598
regulation by alternative promoters 453
repression by chromatin 1173
regulation in liver regeneration 559
Gene targeting
hisD gene in 1641
transgenic mice and 819
Gene therapy: for induction of transplantation tolerance 721
Genetic bottlenecks: in RNA virus evolution 859
Genetic marking: studies of liver development, regeneration, and cancer 673
Gene transcription
antioxidant and redox regulation of 709
induction of cytochrome P4501A1 as a model for 809
Geranylgeranyl pyrophosphate synthase: enzyme in carotenoid biosynthesis 228
Glomeruli: effects of anti-MCAF/MCP-1 in 1418
Glomerulonephritis: crescentic, intervention by MCAF antibodies 1418
Glucocorticoid responsive elements: in hormonal regulation of hepatic enzymes 1369
Glucocorticoids
induction of MIF 1607
regulation of PAH induction of genes 1369
Glucokinase: rate limiting for glucose utilization in liver 1213
Glucose
interconversion with galactose in the Leloir pathway 461
utilization in liver 1213
Glucose starvation: protein synthesis inhibition in response to 1378
Glutamate receptors: in subpopulation of anterior pituitary cells 654
Glutaminase: in glutamine metabolism 8219
Glutamine: nutrition and metabolism 829
Glutamine synthetase: in glutamine metabolism 821
Glutathione
abnormal levels after interleukin-6 treatment 1219
depletion and oxidative damage 1532
mitochondrial oxidation and oxidative damage to DNA 333
in regulation of redox-sensitive gene expression 709
Glutathione S-transferase: hormonal regulation of 1369
Glycans: schistosome 838
Glycoinositol phospholipids: anchoring of proteins in cell-surface engineering 574
Glycoproteins: diagnostic in schistosomiasis 838
Glycosphingolipids: schistosome 838
Glycosylation: N-linked, donor and acceptor substrates for 849
Glycosyltransferases: schistosome 838
Gly-Pro-Arg: in blood clot formation 1464
Gonadal sex differentiation: Ad4BP/SF-1 transcription factor and 1569
Gonyaulax polyedra: nitrate and circadian system in 1443
G protein binding sites: of human interleukin-8 receptors 1426
G protein-coupled receptors: regulating growth responses 741
G proteins: heterotrimeric, GTP binding motif of 1347
Graft rejection
GPI-anchored proteins in protection against 574
mechanisms of 721
Grants: "no crystals, no grant" (Letter) 529
Granulocyte-macrophage colony-stimulating factor
effect on ADCC effector function 258
in lipid mediator biosynthesis regulation 1147
Granzymes: role in apoptosis 587
GR-like proteins: classical fold of 1257
GroE
chaperone function reduced by *groES* mutations 148
the chaperone role model 10
temperature-sensitive mutants suppressed by 57
GroEL
interaction with α-lactalbumin 102
models for functions of 20
role in protein folding 5
GroES
models for functions of 20
role in protein folding 5
***GroES* gene:** suppressor analysis of mutations in 148
Growth factors
expression in hepatic stem cell activation 1249
fibronectin transcriptional regulation and 248

regulation of STAT-dependent pathways by 1578
role in liver regeneration in transgenic mice 819
thrombospondin-1 interaction with 1183
Growth hormones: P450 gene expression mediated by 1112
Growth responses: G protein-coupled receptors and signaling regulating 741
G6PD-deficient variant A⁻: unproductive folding of 153
GTPases: Ras superfamily of 625
GTP binding motif: variations on a theme 1347
GTP binding proteins: interplay with Ras-related binding proteins 1290
Gyro mice: molecular defect in sodium-phosphate transporter in 751

Halothane: as partial agonist of $GABA_A$ receptor 1539
Harderian glands: melatonin prevention of cell damage in 882
Heat shock: protein synthesis inhibition in response to 1378
Heat shock protein 90
decrease in hypertrophic cardiomyopathy 1198
a specific general chaperone 10
Heat shock proteins
folding intermediates as substrates for 57
suppression of irreversible unfolding reactions in 10
Heavy metal ion exposure: protein synthesis inhibition in response to 1378
Helicobacter pylori: and peptic ulcer disease 731
Hematopoietic cells: effects of CD38 on 1408
Heme: cysteine thiolate-liganded 552
Heme-regulated inhibitor kinase: in regulation of protein synthesis 1378
Hemidesmosomes: structure and function of molecular components 871
Heparan sulfate: a piece of information 1270
Heparan sulfate proteoglycans: thrombospondin-1 interaction with 1183
Heparin
biosynthesis and interactions of 1270
calcium leak in the presence of 302
Hepatic enzymes: involved in foreign compound metabolism, regulation of 1369
Hepatocarcinogenesis
genetic susceptibility to 865
initiation step of 1118
Hepatocellular carcinoma
altered retinoic acid receptors in 955
development of hepatocytes into 673
Hepatocyte growth factor
action in liver regeneration studied in transgenic mice 819
in hepatic stem cell activation 1249
role in liver regeneration 1118
Hepatocyte nuclear factor 1: homodomain family of 267
Hepatocytes
apoptosis induced by choline deficiency in 510
culture systems for 1479
during liver regeneration 559
effect of extracellular matrix geometry on function of 1471
genetic marking studies of 673
phospholipase A_2 and hypoxic injury in 1318
proliferation after hepatic resection 215
proliferation induced by mitogens 1118
source of proliferating 819
transcription factors and differentiation of 267
Hepatotrophic stimulator substance: increase after partial hepatectomy 215
Herpes virus infection: in vitamin A deficiency 979
Heterotrimeric G-proteins: in growth response regulation 741
Hexokinase: functional interaction with ATP 799
Hindbrain: sensitivity to teratogenic effects of retinoic acid 969
Hippocampus
metallothionein III and zinc homeostasis in 1129
phospholipase D activity increased by dietary choline 1653
HisD gene: in gene targeting 1641
Histidine kinase systems: osmotic regulation of gene expression in 1598
Histidinol: fibroblast feeder layers resistant to 1641
Histone acetylase: activity in a transcriptional adaptor complex 1173
Histones: in apoptosis 587
HIV infection
antibody-dependent cellular cytotoxicity in 258
progression, effects of glutamine on 821
role of CD38 in 1408
vitamin A status and 1040
HNF-1α: expression of P450 genes regulated by 1112
HNF3/fkh winged helix family 267
Homeostasis: microsomal cytochrome P450 in 1456
***Hox* genes:** retinoids and 969
5-HT_4 receptors: peripheral, physiology and pharmacology of 1398
Human intestinal trefoil factor: expression in hypothalamus and pituitary 1518

Huntington disease: a trinucleotide repeat disorder 1589
Hyalectans: a family of proteoglycans 598
Hyaluronan: binding by hyalectans 598
Hydrogen bonding: contributions to protein stability 75
Hydrogen peroxide: inhibition of iron regulatory protein 1326
Hydrophobic effect
contributions to protein stability 75
and stability of folded proteins 35
***trans*-4-Hydroxynonenal:** inactivation of cytochrome P450 428
N-(4-Hydroxyphenyl) retinamide: bioactivities of 1014
Hydroxytetraenoic acids: vasoactive properties 1456
Hyperimmune serum: restoration of ADCC by 258
Hyperplasia: versus liver regeneration 1118
Hypertension: cytochrome P450 and the arachidonic acid cascade in 1456
Hyperthermophiles: thermal adaptation of 84
Hypertonically shrunk cells: volume recovery of 920
Hypervitaminosis A: and impairment of skin barrier function 1002
Hypoglycosylation: in vivo consequences of 849
Hypophosphatemic mice: molecular defect in sodium-phosphate transporter in 751
Hypothalamic releasing hormones: anterior pituitary cell response to 654
Hypothalamus: expression of human intestinal trefoil factor in 1518
Hypoxic injury: contribution of phospholipase A2 to 1318

IgM locus: dominant expression of 1227
Immediate early genes
expression during liver regeneration 1118
in regenerating liver 413
Immobilization stress: causes oxidative damage in rat brain 1532
Immune response: MIF as regulator of 1607
Immunobiology: of transplantation 721
Immunoglobulin G: binding to natural killer cells 1495
Immunoglobulin M: binding to natural killer cells 1495
Immunoglobulins: cytophilic 1495
Inclusion body precursors: thermolabile folding intermediates and 57
Inclusion body proteins: in vitro folding of 49
Inducible NO synthase II: constitutive expression in guinea pig skeletal muscle 1614
Infection: effects of glutamine supplementation in 821
Inflammation
a component of atherosclerosis 283
effect on retinol transport and metabolism 979
Inflammatory response: in gastric mucosal defense 731
Influenza A virus infection: in vitamin A deficiency 979
Inositol 1,4,5-trisphosphate: effect on cellular calcium signaling 1505
Inositol transporter: activation by hypertonicity 1598
Integrins
hemidesmosome, structure and function of 871
thrombospondin-1 binding to 1183
Interferon-γ
effect on ADCC effector function 258
and LAG-3-encoded protein expression by T cells 769
Interferon-responsive genes: STAT dimerization and responses of 1578
Interleukin-1
during liver regeneration 215
in growth regulation during liver regeneration 413
impact on lipid mediator networks 1147
Interleukin-1 receptors: on rat brain endothelial cells 351
Interleukin-1β
enhancement of calcium channel current by 785
induction of sphingolipid hydrolysis 1388
Interleukin-1β converting enzyme
in endothelial cell apoptosis 1192
role in apoptosis 587
Interleukin-2
effect on ADCC effector function 258
and effects of radiofrequency radiation on T cells 913
production suppressed by partial sleep deprivation 643
Interleukin-4: and release of LAG-3-related peptides 769
Interleukin-6
and abnormal glutathione and sulfate levels 1219
during liver regeneration 215
in growth regulation during liver regeneration 413
production in rat brain endothelial cells 351
Interleukin-8 receptors: identification of G-protein binding sites of 1426
Interleukin-12: up-regulation of LAG-3 expression 769
Internet biologist 200, 540
Intestine carcinogenesis: genetic susceptibility to 865
Intracellular loops: functional mapping of 1426
Iron-deficiency anemia: vitamin A deficiency and 1040
Iron regulatory protein: superoxide and H_2O_2-dependent inhibition of 1326
Irritable bowel syndrome: treatment with 5-HT_4 receptor agonists and antagonists 1398

Kainate: neuronal effects prevented by melatonin 891
Kainate receptors: in anterior pituitary cells 654
Katchalski-Katzir, Ephraim: scientist and statesman 1233
Kennedy disease: a trinucleotide repeat disorder 1589
Keratinocytes: responses to retinoids 1002
Kinases: CD38 in activation of 1408

Labial genes: and the retinoic acid response 969
α-Lactalbumin: molten globule state of 102
LAG-3-encoded protein: expression by human CD4+ T cells 769
Lamins: targets of proteases during apoptosis 587
Latency: viral, related to DNA methylation 471
L-channel current: modulation by PACAP 1310
LDH-like proteins: classical fold of 1257
Leaves: carotenoids in 403
Legume-*Rhizobium* symbiosis: sulfated carbohydrates in 1137
Leloir pathway: for three enzymes 461
Leukocyte-derived growth factor: links PDGF and CXC chemokine families 1336
Leukoplakia: incidence reduced by N-(4-hydroxyphenyl) retinamide 1014
Leukotrienes: pharmacologic intervention in biosynthesis of 1147
Lewis x antigen: on fucosylated schistosome glycans 838
Ligand binding
in energy transducing assemblies 702
within cavities 35
Limb development: retinoic acid and 961
Lipid hydroperoxides: reductive scission of 428
Lipid mediator networks: in cell signaling 1147
Lipid peroxidation: increased by immobilization stress in rat brain 1532
Lipoate-dihydrolipoate couple: in regulation of redox-sensitive gene expression 709
Lipogenesis: inhibition by sulfonamide carbonic anhydrase inhibitor 481
Lipopolysaccharide: enhancement of calcium channel current by 785
Lipoproteins: carotenoid transport by 542
Liver
constitutive expression of P450 genes in 1112
cysteine catabolism in 1219
differentiation, model for 267
fibrosis, fibronectin variants in 248
glucose utilization in 1213
Liver carcinogenesis: inhibition by retinoids 1031
Liver regeneration
analysis by genetic marking studies 673
hepatic stem cells in 1249
regulation of signal transduction during 215
role of mRNA stability in 559
transcriptional control of 413
transgenic mice as tool to study 819
versus direct hyperplasia 1118
Low density lipoprotein: effects on macrophage mobility 491
L-pyruvate kinase: activity in transgenic mice 1213
Lung cancer: effects of β-carotene on 690
Lung carcinogenesis: inhibition by retinoids 1031
Lung development: retinoids in 986
Lung tumorigenesis: genetic susceptibility to 865
Lung tumors: in mice expressing antisense RARβ-2 transgene 1091
Luteinizing hormone: half-life controlled by sulfated oligosaccharides 1137
Lycopene: cyclization of 228
Lymphocytes: sulfated oligosaccharides in homing of 1137
Lymphokine-activated killer cells
activity reduced by partial sleep deprivation 643
restoration of ADCC by 258
Lyn protein-tyrosine kinase: Tec protein-tyrosine kinase an effector molecule of 637

Machado-Joseph disease: a trinucleotide repeat disorder 1589
Macrophage migration inhibitory factor: cytokine, pituitary hormone, and immune regulator 1607
Macrophages
calcium effects on recruitment of 491
number in glomeruli decreased by anti-MCAF/MCP-1 in 1418
transplantation in CNS regrowth failure 1296
Macular degeneration: effects of carotenoids on 690
MAE cells: bFGF-deprived, apoptosis of 1192
Magnetic resonance: biological, origins of 1448
Mammary gland carcinogenesis: inhibition by retinoids 1031
Masking: of mRNA by Y-box proteins 435
Mass spectrometry: investigation of protein folding by 93
Matrix metalloproteinases: role in arterial remodeling 283
Measles: vitamin A deficiency and 1040
Mechanical load: induction of sarcoplasmic wounding and FGF release 502
Mechanical stretch: activation of protein kinases 631
Melatonin
neuroprotection by 891, 1546
prevention of cell damage by 882

MEKK/JNK: in growth response regulation 741
Membranes: incorporation of GPI-anchored proteins into 5 74
Metabolism
endogenous by cytochromes P450 1455
intermediary, the origins of 802
Metallothioneins: brain, functional significance of 1129
Metal metabolism: metallothioneins in 1129
Metastasis: growth regulation by thrombospondin-1 1183
Methylation: *S*-adenosylmethionine and 471
Methyltrienolone: in restoration of cytochrome P450 2C11 1058
***mFtz-F1* gene:** regulatory mechanism of 1569
Microfilaments: structure reorganization induced by ac electric fields 1552
Microgravity: PKC distribution in leukocytes altered in 1627
Microtubules: apolipoprotein E in depolymerization of 1485
Migration: cell, inhibition by aggrecans and versicans 293
Mitochondria
glutathione oxidation and DNA damage in 333
oxidative damage caused by immobilization stress in 1532
P/O ratios of 345
Mitogen-activated protein kinase
activation by sphingosine 1388
activity controlled by Ras 1290
in growth response regulation 741
Mitogens: effects in liver 1118
Mitosis: absent in cells treated with choline 510
Molecular switches
GTP binding motif as 1347
Ras GTPases as 625
Molten globule state: of α-lactalbumin 102
Monocyte chemotactic and activating factor: antibodies and crescentic glomerulonephritis 1418
Monte Carlo procedure: protein folding by 119
Mouse light chain: replaced by human Igκ locus 1227
mRNA
isoforms with altered stability 453
masking by Y-box proteins 435
role in gene expression in liver regeneration 559
Mucosal immunity: Paneth cells and 1280
Mucus: in gastric mucosal defense 731
Muller's ratchet: and RNA virus evolution 859
Multiple organ system failure: effects of glutamine supplementation in 821
Murine acquired immunodeficiency syndrome: altered brain fyn kinase in 339
Muscle wasting: effects of glutamine supplementation in 821
Musculus uvulae: contractile and metabolic characteristics 897
Mutations
of Arc repressor dimer 42
in cell cycle checkpoint control genes 238
and destabilization of T4 lysozyme 35
effect on the denatured state 27
in glucose-6-phosphate dehydrogenase deficiency 153
in *groES* gene of *Escherichia coli* 148
second-site reversion of 159
of staphylococcal nuclease 67
temperature-sensitive folding 57
Myelin protein Po: in autoimmune inner ear disease 1635
Myeloma: role of CD38 in 1408
Myotonic dystrophy: a trinucleotide repeat disorder 1589

NAD-linked substrates: mitochondrial P/O ratios with 345
NAD(P)H: quinone oxidoreductase: hormonal regulation of 1369
Nafoxidine: effects in ovariectomized rats 905
Na, K, Cl cotransport: in cell volume increase during the cell cycle 920
National Institutes of Health: peer review at in the 21st century 1563
Natural killer cells
activity reduced by partial sleep deprivation 643
correlation with ADCC activities 258
effect of acute stress on 517
immunoglobulin G interaction with 1495
in vitamin A-deficient hosts 979
Neoplasms: prevention by *N*-(4-hydroxyphenyl) retinamide 1014
Nerve growth factor: induction of sphingolipid hydrolysis 1388
Nerves: of the central nervous system, inability to regenerate 1296
Neural crest cells: migration inhibited by aggrecans and versicans 293
Neurites: impact of apolipoprotein E on extension of 1485
Neurodegeneration: role of metallothionein III in 1129
Neurodegenerative diseases
human apolipoprotein E in 1485
melatonin deficiency in 1546
Neuronal development: all-*trans* 3,4-didehydroretinoic acid in 1078
Neuronal NO synthase I: constitutive expression in guinea pig skeletal muscle 1614
Neurons: apolipoprotein in repair and remodeling of 1485
Neutrophil activating peptide 2: leukocyte-derived growth factor precursor of 1336

Newcastle disease virus infection: in vitamin A deficiency 979
Nicotinamide dinucleotide binding motif: comparison of nucleotide binding proteins 1257
Nicotinamide nucleotide transhydrogenase: model for utilization of binding energy for translocation 444
Nigericin: in calibrations of BCECF 1205
Nitrate: a signal for the circadian system 1443
Nitric oxide
modulators of mucosal defense 731
signal, production by L-arginine 552
synthesis stimulated by estrogen 615
Nitric oxide synthase
constitutive expression in guinea pig skeletal muscle 1614
inducible, expression in gestational diabetes 777
neuronal, an enzyme formed by convergent evolution 552
NMDA receptors: in anterior pituitary cells 654
Nodulation factor: of *Rhizobium meliloti* 1137
Nuclear factor-κB
activation during liver regeneration 1118
of liver regeneration 413
redox regulation of 709
Nuclear hormone receptors: primary mitogens acting through 1118
Nuclear transport: Ras GTPases in 625
Nucleolin: proteolytic cleavage of 587

Obesity: effects of calcium channel blockade on 1646
Okadaic acid: sensitization of cells to TNF and UV activation 325
Oligosaccharyltransferase: biochemistry, molecular biology, and genetics of 849
Opsonization: cytophilia versus 1495
Optic nerve: absence of regrowth in 1296
Oral cavity carcinogenesis: inhibition by retinoids 1031
Organ regeneration: regulation of 215
Oscillations: of cytosolic free calcium 1505
Osmotic regulation of gene expression 1598
Oval cells: genetic marking studies of 673
Ovariectomized rats: effects of four compounds in 905
Oxidants: and regulation of gene transcription 709
Oxidative injury: superoxide and H_2O_2 in protection against 1326
Oxidative refolding: investigation by mass spectrometry 93
Oxidative stress: and damage to mitochondrial DNA 333
Oxygenase ω/ω-1: in development of hypertension 1456
Oxytocin: modulatory action of hITF on 1518

Pancreatic carcinogenesis: inhibition by retinoids 1031
Paneth cells: defensins of 1280
Pattern formation
and embryonic development 961
retinoic acid response elements and 969
Peer review: at NIH in the 21st century 1563
Penicillin: the view from Oxford in the early 1950s 525
P-enolpyruvate carboxykinase gene promoter: glucokinase expression controlled by 1213
Peptic ulcer disease: *Helicobacter pylori* association with 731
Peptidase activities: selective monitoring of 1621
Peptide mass fingerprinting: of chaperonin-containing TCP-1 and copurifying proteins 137
Peripheral tissues: 5-HT_4 receptor-mediated effects in 1398
Perlecan: genes encoding 598
Peroxides: as oxygen donors, substrates, and intermediates 428
Peroxisome proliferator-activated receptor: role in cytochrome P450 4A gene regulation 1241
p53: and cell cycle checkpoints 238
Phage P22 proteins: folding intermediates for 57
Phorbol myristate acetate: increase in L-channel current mimicked by 1310
Phosphate binding consensus: of nicotinamide binding proteins 1257
Phosphatidylinositol-phospholipase C: crystal structures 1159
Phospholamban: mRNA, effect of etomoxir on 1303
Phospholipase A_2
contribution to hypoxic injury in rat hepatocytes 1318
in sex-dependent expression of P450 genes 1112
solution structures of 1159
Phospholipase C: effect on cellular calcium signaling 1505
Phospholipase D: increased by dietary choline supplementation 1653
Phospholipases
in lipid mediator generation 1147
motifs for working at an interface 1159
Phospholipids: surface-active, in gastric mucosal defense 731
Phosphorylation
and binding of Y-box proteins 435
by Lyn protein-tyrosine kinase 637
and oxidant-antioxidant homeostasis 709
role of CD38 in 1408
tyrosine, in growth response regulation 741
Photoprotection: carotenoids in 403
Photosensitivity diseases: effects of carotenoids on 690
Photosynthesis: carotenoids in 403
Phytoene synthase: enzyme in carotenoid biosynthesis 228
Picrotoxin: blockage of halothane- and GABA-activated currents 1539
Pituitary: expression of human intestinal trefoil factor in 1518
Pituitary adenylate cyclase activating polypeptide (PACAP): modulation of L-type calcium channel currents 1310
Pituitary hormone: MIF as 1607
Placenta
erythropoietin expression by 760
expression of inducible nitric oxide synthase in 777
Plakoglobin: structure and function of 871
Plakophilin/band 6: structure and function of 871
Plaque molecules: of desmosomes 871
Plasmacytomagenesis: genetic susceptibility to 865
Platelet-activating factor
opening of calcium-activated K^+ channels in eosinophils 792
phospholipases in generation of 1147
Platelet basic protein: Leukocyte-derived growth factor precursor of 1336
Platelet-derived growth factor
induction of ceramide hydrolysis 1388
linked to CXC chemokine family 1336
Pleckstrin homology domains: in GTPase communication 1290
P19 embryonal carcinoma cells: induction of apoptosis and neuronal differentiation in 1071
Polarity: effects of extracellular matrix on 1471
Poly(ADP-ribose) polymerase: target of proteases during apoptosis 587
Polycyclic aromatic hydrocarbons: induction of cytochrome P4501A1 1369
Polygenic model: of inherited predisposition to cancer 865
Polyion-sensitive membrane electrode detection: monitoring of peptidase activities with 1621
Polypeptide substrates: synthetic, monitoring of peptidase activities with 1621
Polysaccharides: biosynthesis of 1270
P/O ratios: mitochondrial with succinate and NAD-linked substrates 345
Porphyrins: synthesis inhibited by melatonin 882
Posthepatectomy factor: of liver regeneration 413
Posttranscriptional regulation: of gene expression in liver regeneration 559
Potassium channels: cytoskeletal control of rectification in 357
Premalignant lesions: retinoid effects on 1031
Pressure overload: effect on heart modified by etomoxir 1303
Proliferating cell nuclear antigen: expression inhibited in cells treated with choline 510
Proliferating cells: DNA damage in 238
Proline zipper: in the collagen/collagenase interaction 927
Prometheus' myth revisited 819
Promoters: alternative, regulation of gene expression by 453
Promyelocytic leukemia gene: retinoic acid receptor fusion to 955
Propranolol: effect on response to acute stress 517
Prostacyclin
production in rat brain endothelial cells 351
synthesis stimulated by estrogen 615
Prostaglandin E_2: production in rat brain endothelial cells 351
Prostaglandins: modulators of mucosal defense 731
Prostatic carcinogenesis: inhibition by retinoids 1031
Protease-activated receptors: in calcium mobilization 309
Proteases
role during apoptosis 587
thrombospondin-1 regulation of 1183
Protein engineering: of cell surfaces with GPI-anchored proteins 574
Protein fold: recognition by sequence threading 171
Protein folding
by a biased Monte Carlo procedure 119
in the cell 20
a determinable but unresolved problem 3
of enzymes from thermophiles 84
of eye lens crystalling 84
of inclusion body proteins 49
intermediate state in 67
investigation by mass spectrometry 93
from protein coagulation and reversible denaturation to 179
of P22 Arc repressor dimer 42
role of chaperonin proteins in 5
roles of partly folded intermediates in 110
suppressor analysis of mutations in *groES* gene 148
of T4 lysozyme 35
thermolabile intermediates in 57
three-state model of 67
of ultrastable proteins 84
unfolded state of cytochrome c 164
unproductive, of G6PD-deficient variant A. 153
Protein folds: assigning amino acid sequences to 126
Protein isoforms: generated with alternative promoters 453
Protein kinase C
distribution in leukocytes altered in microgravity 1627

effect on cellular calcium signaling 1505
in PACAP modulation of calcium channel currents 1310
Protein kinases: activation by mechanical stretch 631
Protein-protein interactions: in growth response regulation 741
Proteins
damage caused by immobilization stress in rat brain 1532
mammalian GPI-anchored 574
Protein stability
forces contributing to 75
role of the denatured state in 27
Protein synthesis: eIF-2α kinases and 1378
Protein-tyrosine kinases: phosphorylation and regulation of 637
Proteoglycans
aggrecan and versican families of 293
of the extracellular environment 598
Proteolysis: mediated by ubiquitin 587
Proto-oncogenes: the discovery of 362
p21-activated kinase: activity regulated by GTPases 1290
P22 Arc repressor dimer: folding and stability of 42
Public health: contribution of vitamin A to 1040
Pyruvate: carboxylation in adipocytes 481

Quasispecies: in RNA virus evolution 859

Radiofrequency radiation: isothermal, effects on cytolytic T lymphocytes 913
Raloxifene: effects in ovariectomized rats 905
RANTES: opening of calcium-activated K^+ channels in eosinophils 792
RARβ2 antisense transgene: lung tumors in mice expressing 1091
Ras/MAP kinase cascades: in growth response regulation 741
Ras-related binding proteins: interplay with heterotrimeric GTP binding proteins 1290
Ras superfamily
diverse roles of 625
GTP binding motif of 1347
Rectification: cytoskeletal control of in potassium channels 357
Red Queen hypothesis: in RNA virus evolution 859
Redox regulation: of gene transcription 709
Regeneration: effect of transplanted macrophages on 1296
Relaxation: endothelium-dependent 283
Renal medullary cells: response to extreme osmotic stress 1598
Renin: activities detected with synthetic substrates 1621
Reproductive function: Ad4BP/SF-1 transcription factor and 1569
Retinal
cleavage of β-carotene to 542
HPLC-electrospray mass spectrometry of 1098
Retinoic acid
acceleration of fetal lung branching 986
biosynthesis and metabolism 993
in embryonic development 961
HPLC-electrospray mass spectrometry of 1098
sensitivity of acute promyelocytic leukemia to 1025
synthesis inhibited by ethanol 1050
9-*cis*-Retinoic acid: formation from 9-*cis*-β-carotene 542
Retinoic acid receptor: analysis of AF-2 domain of 1524
Retinoic acid receptor ligands: induction of apoptosis by 1071
Retinoic acid receptors
altered 955
defective expression in breast cancer cells 1064
molecular biology of 940
Retinoic acid response elements
and pattern formation in vertebrate embryo 969
polymorphism of 940
Retinoic acid-responsive elements 1524
Retinoid
actions in skin 1002
differentiation therapy in promyelocytic leukemia 1025
revolution, overview of 938
Retinoid binding proteins: functions of 993
Retinoid receptors: and their target genes in skin 1002
Retinoid X receptor ligands: induction of apoptosis by 1071
Retinoid X receptors: molecular biology of 940
Retinoids
in antiviral responses 979
in cancer chemoprevention 1031
cause apoptosis in embryonal carcinoma cells 1071
a history of 1102
and *Hox* genes 969
HPLC-electrospray mass spectrometry of 1098
in lung development 986
Retinol
deprivation, lung sensitivity to 986
HPLC-electrospray mass spectrometry of 1098
lymphatic absorption in rats 1085
reduced mobilization in vitamin A deficiency 979
Retinol binding protein: in embryonic development 961
Retinol binding protein type I: defective expression in breast cancer cells 1064
Retinol dehydrogenase: isozymes 993
Retinoyl β-glucuronide: bioactivities of 1014
Retinyl acetate: HPLC-electrospray mass spectrometry of 1098
Retroviral infections: in vitamin A deficiency 979
Rhodobacter capsulatus: carotenoid biosynthesis from 228
RNA-dependent kinase: in regulation of protein synthesis 1378
RNA polymerase II: chromatin remodeling in 1173
RNase T1: conformational stability of 75
RNA viruses: basic concepts in evolution of 859
Rotavirus infection: in vitamin A deficiency 979
Rous, Peyton: homage and appraisal 1559
Rubisco: role of chaperonins in folding of 5
Ruthenium red: calcium leak in the presence of 302

***Salmonella typhimurium hisD* gene:** in gene targeting 1641
Sandwich configuration: extracellular matrix studies with hepatocytes in 1471
Sarcolemma: wounding induced by mechanical load 502
Sarcoplasmic reticulum: gene expression modified by etomoxir 1303
Scatter factor: action in liver regeneration studied in transgenic mice 819
Schistosomiasis: glycobiology of 838
Second messengers: lipid 1159
Second-site reversion: of structural defect in T4 lysozyme 159
Sensitization: in graft rejection 721
Sequence determinants: of folding and stability of P22 Arc repressor dimer 42
Sequence threading: protein fold recognition by 171
Serine proteases: role during apoptosis 587
Serpins: role in apoptosis 587
Serum deprivation: protein synthesis inhibition in response to 1378
Side chains: size and P450 specificity 683
Signaling
of cellular calcium 1505
desmosomes and hemidesmosomes in 871
mitogenic, regulation by G-protein-coupled receptors 1290
Tec and Lyn protein-tyrosine kinases in 637
Signaling pathways
cross-talk between 1578
regulating growth responses 741
Signal transduction
cascades initiated by ac electric fields 1552
effect of gravity on 1627
lipid mediator networks in 1147
regulation during liver regeneration 215
sensitivity to oxidants and antioxidants 709
stress transmission and 283
triggered by Fc receptors 1495
Skeletal muscle
cultures, effects of mechanical load in 502
expression of NO synthases in 1614
Skin: retinoid actions in 1002
Skin carcinogenesis
genetic susceptibility to 865
inhibition by retinoids 1031
Sleep apnea hypopnea syndrome: upper airway dilator muscle in 897
Sleep deprivation: reduction of natural killer and cellular immune responses 643
Small leucine-rich proteoglycans (SLRPs) 598
Snoring: nonapneic, upper airway dilator muscle in 897
Sodium-phosphate transporter: molecular defect in Gyro and hypophosphatemic mice 751
Solvent: binding within cavities 35
S-100 proteins: effects on desmin assembly 317
Sphingolipids: metabolism and cell growth regulation 1388
Sphingomyelinase
defect and tumor cell resistance to apoptosis 325
in lipid mediator generation 1147
Spinal and bulbar muscular atrophy: a trinucleotide repeat disorder 1589
Spinocerebellar ataxia type 1: a trinucleotide repeat disorder 1589
Splenectomy: and immunologic response to acute stress 517
Splicing: fibronectin gene as a model for 248
Staphylococcal nuclease mutants: thermodynamics of denaturation of 67
STAT-dependent pathways: regulation by growth factors and cytokines 1578
STAT protein: in sex-dependent expression of P450 genes 1112
Stat3: of liver regeneration 413
Stem cell factor/c-kit system: in hepatic stem cell activation 1249
Stem cells
hepatic, in liver regeneration 1249
in the liver 673
Steroidogenic cytochrome P450 genes: Ad4BP/SF-1, a transcription factor essential for 1569

Steroidogenic tissues: Ad4BP/SF-1 expression during differentiation of 1569
Steroids: effects counterbalanced by MIF 1607
Stress
down-regulation of protein synthesis in response to 1378
importance of molecular chaperones in 10
metallothioneins in adaptation to 1129
modulation of immunologic response to 517
Stress-activated protein kinases (SAPKs): activation by mechanical stress 631
Stroke
brain damage after in melatonin-deficient rats 1546
melatonin potential for treatment of 891
Stromal cells: thrombospondin-1 effects on 1183
Succinate: mitochondrial P/O ratios with 345
Sudden-death pigs: decrease of heat shock protein 90 in 1198
Sulfate: abnormal levels after interleukin-6 treatment 1219
Sulfated carbohydrates: biological roles of 1137
Sulfonamide carbonic anhydrase inhibitors: inhibition of de novo lipogenesis 481
Superoxide: inhibition of iron regulatory protein 1326
Superoxide dismutase: iron regulatory protein inhibition prevented by 1326
Syncytiotrophoblasts: a site of erythropoietin expression 760
System A: in cell volume increase during the cell cycle 920

Tailspike proteins: folding intermediates for 57
Tamoxifen: effects in ovariectomized rats 905
Taurine transporter: activation by hypertonicity 1598
T cells: in transplantation 721
Tec protein-tyrosine kinase: effector molecule of Lyn protein-tyrosine kinase 637
Tetrahydrobiopterin: regulation of neuronal nitric oxide synthase 552
T4 lysozyme
folding and function of 35
second-site reversion of structural defect in 159
Thapsigargin: calcium leak in the presence of 302
Thermogenesis: regulation by *agouti* 1646
Thermolabile folding intermediates 57
Thermophile enzymes: stability and folding of 84
Thermotolerance: molecular chaperones in 10
Thioredoxin: in regulation of redox-sensitive gene expression 709
Thrombin
in blood clot formation 1464
calcium mobilization induced by 309
Thrombin receptor: in thrombosis 283
Thrombin receptor agonist peptide: calcium mobilization induced by 309
Thrombosis
mechanisms of 283
treatment with all-*trans* retinoic acid 1025
Thrombospondin-1: regulation of tumor growth and metastasis 1183
Thyrotropin-releasing hormone: anterior pituitary cell response to 654
T leukemic cell lines: protease-activated receptors of 309
Tolerance: in transplantation 721
Total parenteral nutrition: animal models of intestinal atrophy induced by 821
Transactivation
amino acids critical for 1524
of retinoic acid receptors 940
Transcription
in blood clot formation 1464
chromatin and 1173
fibronectin gene as a model for 248
initiation with alternative promoters 453
Y-box proteins in regulation of 435
Transcriptional control: of liver regeneration 413
Transcription factors
expression of P450 genes regulated by 1112
and hepatocyte differentiation 267
Transformation: inhibition by retinoids 1031
Transforming growth factor-α
action in liver regeneration studied in transgenic mice 819
in hepatic stem cell activation 1249
increase after partial hepatectomy 215
role in liver regeneration 1118
Transforming growth factor-β
action in liver regeneration studied in transgenic mice 819
activation by thrombospondin-1 1183
Transforming growth factor-β1: role in liver regeneration 1249
Transgenic mice
for establishment of fibroblast feeder layers 1641
and glucose utilization in liver 1213
locus introduction in 1227
as tool to study liver regeneration 819
Transhydrogenation: and proton translocation 444
Translation: Y-box proteins in regulation of 435
Translocation: utilization of substrate binding energy for 444
Transplantation: immunobiology of 721
Trefoil factor, human intestinal 1518
Trifluormethanesulfonamide: inhibition of de novo lipogenesis 481
Trinucleotide repeat disorders: mechanisms and medical issues 1589
Trophoblast cells: a site of erythropoietin expression 760
Trypsin: calcium mobilization induced by 309
Tumor cells: resistance to apoptosis 325
Tumor necrosis factor: in lipid mediator biosynthesis regulation 1147
Tumor necrosis factor-α
activation of sphingomyelinase 325
during liver regeneration 215
enhancement of calcium channel current by 785
in growth regulation during liver regeneration 413
induction of sphingolipid hydrolysis 1388
primary mitogens acting through 1118
Tumors: growth regulation by thrombospondin-1 1183
Tyrosine kinase: role in hepatocyte proliferation 215

Ubiquitin: proteolysis mediated by 587
UDP-galactose 4-epimerase: in the Leloir pathway 461
UDP-glucuronosyltransferase: hormonal regulation of 1369
Ulcers: repair of 731
Ultraviolet light: activation of sphingomyelinase 325
Upper airway: collapsibility and musculus uvulae 897
Urinary bladder carcinogenesis: inhibition by retinoids 1031
Urinary incontinence: treatment with 5-HT_4 receptor agonists and antagonists 1398
Uterus: advantages of raloxifene in 905

Vaccines: cancer, GPI-anchored proteins in development of 574
Vascular growth: endothelial control of 283
Vascular smooth muscle cells
calibrations of BCECF in 1205
cytokine enhancement of calcium channel current in 785
modulation of calcium channel current by PACAP in 1310
Vascular smooth muscle: estrogen activity in 615
Vasodilation: promoted by extrogen administration 615
Vasopressin: modulatory action of hITF on 1518
Versican: inhibitory effects on neural crest cell migration 293
Vesicles: Ras GTPases in traffic of 625
Viral infection: protein synthesis inhibition in response to 1378
Viral transformation: fibronectin transcriptional regulation and 248
Virus-specific neutralizing antibodies: in anti-HIV immunization and immunotherapy 258
Vitamin A
in antiviral responses 979
contribution to public health 1040
conversion of β-carotene to 542
in growth and differentiation of skin 1002
history of 1102
status and retinoic acid biosynthesis 993
Vitamin A deficiency
embryonic protection against 961
impact on fetus and infant 1045
ocular and systemic consequences of 1040
restoration of cytochrome P450 2C11 in 1058

Waves: of cytosolic free calcium 1505
Wound healing
fibronectin variants in 248
leukocyte-derived growth factor in 1336

Xanthine oxidase: and inhibition of iron regulatory protein 1326
Xanthophyll cycle: carotenoids in 403
Xanthophylls: formation of 228
Xenografts: mechanisms of rejection 721
Xenopus oocytes: masking of endogenous mRNA in 435
X-linked agammaglobulinemia: role of CD38 in 1408
X-linked hypophosphatemic vitamin D-resistant rickets: molecular defect in animal models of 751

Y-box proteins: masking of mRNA by 435
Yeast GCN2: in regulation of protein synthesis 1378
Yeast kinase cascade: osmotic regulation of gene expression in 1598

Zeaxanthin: role in dissipating excess light energy 403
Zinc: metallothionein storage and release of 1129
